SKINS on Campus
BRIDGING INDUSTRY AND ACADEMIA IN PURSUIT
OF BETTER BUILDINGS AND URBAN HABITAT

Join the Facade Tectonics Institute as we move beyond talk and into the realm of action and initiatives aimed at improving building performance and urban habitat through the art, science and technology of the building skin. Our SKINS ON CAMPUS theme combines networking with industry and academic leaders with a deep exploration of the building facade as the integrative factor in holistic building design. Read on for full program details.
